

Proportional Panning D.G. 2004-05-23
like old Amiga apps.

like old Amiga apps.

$$\Rightarrow x_{vp} = \frac{x_m}{w_{vp}} (w_{pa} - w_{vp})$$

e.g. $w_{pq} = 1920$ $w_{vp} = 800$
 $w_{pq} - w_{vp} = 1120$

x_m	$\frac{x_m}{w_{vp}}$	x_{vp}
0	0	0
200	0.25	280
400	0.5	560
600	0.75	840
800	1	1120
